Hello, [Citizen Name/Ex. 6]

I'm sorry, but we aren't able to provide individual interview opportunities at this time. I suggest that you might attend meetings of the Animas Rivers Stakeholders Group. Some of the information you are seeking is on the agenda for the next meeting (attached).

Best regards,

Cynthia

Cynthia Peterson

Subject: Involvement Question

Hello Cynthia Peterson

I am a student here in Durango, Colorado pursuing a degree in engineering and am interested in giving an interview to some of the project engineers on site at the Gold King Mine. I have questions about the current short term treatment process and the long term remediation plan for upper Cement Creek/ Gladstone area. Is there a possibility in meeting up with these people on site and giving an interview?

Thank you for your consideration,

Citizen Name/Ex. 6
